Iceland: a country made by volcanoes

Carry out some research on Iceland. Complete the following questions either in your book, on lined paper, or on the computer.

1. Where is Iceland?
  - a. Name the continent and ocean.
  - b. Include a map if you can.
2. What tectonic activity is there in Iceland?
  - a. Name the two tectonic plates that Iceland sits on.
  - b. What type of plate boundary is Iceland on?
  - c. Describe what happens at this type of plate boundary. A diagram may be useful.
3. How many active volcanoes are there in Iceland?
4. Create a fact file about the Eyjafjallajökull volcanic eruption in 2010
  - a. What were the impacts? (If you can classify them into social/economic/environmental)
