

11th January 2022

Dear Parent/Carer

Springpod virtual work experience package for Year 11 students

I am excited to be writing to you to give you further information about the Springpod virtual work experience package for Year 11 students. Students will be working remotely on Thursday 13th and Friday 14th January.

In a nutshell students will gain access to our School Hub and be able to investigate:

- Sector Insight Experiences – Students can choose their industries of interest and then read and watch videos about this industry. To receive the certificate to demonstrate their understanding they need to complete a task and answer questions based on what they have learnt.
- Employability modules – In a similar format students can read and watch videos about key employability skills learning why they are important and how to gain them. Students will gain a certificate for completion of a quiz at the end of each module.

In the time given students will be able to complete at least one Sector Insight and two Employability modules. I would like them all to complete the Personal Finance module as I think this is an area of understanding we can all benefit from!

Attached to this letter are further details of which sectors and employability skills are included in the package.
